

Trilogy Evo with Care Orchestrator Essence

Manage your Trilogy Evo patients from your desktop

The efficiency and power of the Care Orchestrator online application is now available in an advanced desktop platform. Care Orchestrator Essence delivers actionable patient data¹ directly from Trilogy Evo to care teams, so everyone can work together to make informed clinical decisions. And, by analysing collected data, you can view, qualify and assess a patient's condition—all from a single screen. This makes it easy to identify patients who have experienced a change in therapy and may need therapy changes.

Every Trilogy Evo home ventilator is equipped to connect with Care Orchestrator Essence, providing clinicians and providers quick and easy access to patient-ventilator interaction on their desktop—and helping them manage patients in an efficient, targeted way.

Quickly and easily access patient-ventilator
interaction data on your desktop.

1. Key ventilation parameters, alarm data, device performance and patient usage.

Smother transitions across the continuum

Trilogy Evo with Care Orchestrator Essence
helps you and your patients breathe easy

Monitor and manage respiratory patient data

- View important information from Trilogy Evo, including:
 - Ventilation parameters
