

**PHILIPS**

General care

## Early detection. Empowered care.

Too many patients are dying in lower-acuity hospital units around the world because signs of deterioration are not recognised early enough.\* Philips integrated suite of devices, software, professional and support services help clinicians identify subtle signs of patient deterioration, thus enabling a timely response. It's putting care above all. Because caring for patients matters most. Making that possible matters most to us. There's always a way to make life better.
