

PHILIPS

Image guided therapy

The next leap in lab integration

To enhance focus and control during procedures, we are taking the next leap to integrate essential lab systems and tools onto the Azurion platform. Now you can control all compatible applications from one touch screen module at tableside, to help make fast and informed decisions without breaking sterility.

The advanced SmartCT[†] solution, part of the Azurion image-guided therapy platform, brings advanced 3D visualisation and measurement tools at tableside, which can reveal information not apparent in 2D or DSA images, helping to enhance interventional confidence. All aimed to improve the quality and efficiency of your interventional procedures.

With Philips Azurion, performance and superior care become one.

There's always a way to make life better.
